

Amendments to the Specification:

Please add the following new paragraphs after paragraph [0020]:

[0020.1] Figure 4 is a partial elevation view showing the current rails and collectors;

[0020.2] Figure 4A is an end view of the current rails and collectors; and

[0020.3] Figure 5 is a partial elevation view showing a trailing cable.

Please replace paragraph [0024] with the following amended paragraph:

[0024] The LEDs 26 can be provided with an additional circuit which makes it possible to vary the light radiated by the LEDs 26 with respect to the time during which they are turned on and with respect to its brightness and/or color mixture. Further, the LEDs 26 can be controlled depending on the incident daylight, depending on a person or according to any other program. In order to provide the electrical consumers, in this case the lighting means, with electrical energy, two current rails 61 extending parallel to one another in the longitudinal direction of the leaves 1, 3 and 6 can be arranged in the guide rails, ~~not shown~~ 60, as shown in Figure 4 and 4A. The current rails 61 are arranged in the crossbar 2 by means of corresponding insulation 62.

Please replace paragraph [0025] with the following amended paragraph:

[0025] In order to transfer the energy from the current rails 61 to the moving leaves 1, 3, the ~~latter transfer~~ can be realized by means of corresponding current collectors 63.

Please replace paragraph [0026] with the following amended paragraph:

[0026] It is also conceivable to supply the electric energy to the consumers (LEDs 26) by means of trailing cables 65 which are located inside the crossbar 2, as shown in Figure 5.
